**Explanation:**

### STAFF REPORT

This ordinance amends the Land Development Code to reduce the required side interior setbacks for transect zones U4-U7, from 5 feet to 0 feet. The intent of this request is to allow a larger buildable area on each parcel in these transect zones, enable the efficient use of land, encourage compact development, preserve green space via a reduced incentive to build sprawling development, and improve the value proposition for public transit by adding population density to the urban core.

The City Plan Board held a public hearing on April 25, 2024, where it voted to recommend approval of this amendment to the Land Development Code. This ordinance requires two hearings and will become effective immediately upon adoption at second reading.
