Subject: RE: Concerning mid street parking accident data

Reggie,

There are zero results for the criteria you listed.
When changing type of intersection to 1 (not intersection)   OR   77 (other) then we get two results:
0217018661
0218005686

Let me know if there are any other combinations you want to try.

Thanks,

Chad Griffin

Subject: FW: Concerning mid street parking accident data
Importance: High

Hello Chad,

Records isn't able to pull this information, but I was wondering if you were able to retrieve this data from the accident module for 2017 to present. Thanks again for your continual support.

Motor Vehicle Status = Code 3 (Working Vehicle)
Type of Intersection = Code 77 (Other, Explain in Narrative)
First Harmful Event = Code 15 (Parked Motor Vehicle)

Reggie

Subject: FW: Concerning mid street parking accident data

Reggie/Veronica,

Can you please have your staff pull numbers regarding this "mid-street" parking issue, for Chief Scott.

Motor Vehicle Status: This space is used to identify a motor vehicle status. The term 'in transport' when applied to a motor vehicle means on a roadway or in motion within or outside the trafficway. The term 'working vehicle' refers to a vehicle used as equipment and performing work like cutting trees, painting road lines or spreading gravel. If a working truck is used to transport people or is in route from one place to another and is not painting lines or spreading gravel it is a 'vehicle in transport.'

- Enter the correct code in the box.

1	Vehicle in Transport
2	Parked Motor Vehicle
3	Working Vehicle

We would likely need to narrow the search to this question, "Working Vehicle" and possibly….

Type of Intersection: *This classification is used to identify the type of intersection where the traffic crash occurred.*

- Enter the 'Type of Intersection' code in the space provided.
- If code 77 is used, a separate notation must be made on the Florida Traffic Crash Report Narrative to explain. This notation must be listed separately below the last sentence of the narrative section.

Type of Intersection			
1	Not at Intersection	5	Traffic Circle
2	Four-Way Intersection	6	Roundabout
3	T-Intersection	7	Five-Point or More
4	Y-Intersection	77	Other, Explain in Narrative

1-Not at any intersection, and…

First Harmful Event: *This classification is used to identify the first injury or damage-producing event that characterizes the traffic crash type.*

- Enter the first harmful event in the space provided.

First Harmful Event			
Non-Collision			
1	Overturn/Rollover	6	Fell/Jumped From Motor Vehicle
2	Fire/Explosion	7	Thrown or Falling Object
3	Immersion	8	Ran into Water/Canal
4	Jackknife	9	Other Non-Collision
5	Cargo/Equipment Loss or Shift		
Collision Non-Fixed Object			
10	Pedestrian	15	Parked Motor Vehicle
11	Pedalcycle	16	Work Zone/Maintenance
12	Railway Vehicle (train, engine)	17	Struck By Falling, Shifting Cargo
13	Animal	18	Other Non-Fixed Object

15- Parked Motor Vehicle

He needs this ASAP, as indicated below.

Chief,

I tried to get in touch with Castillo this morning to identify what he is defining as "mid-street parking." I have not heard back yet.

Subject: Concerning mid street parking accident data

Good Morning Chief Scott,

I was wondering if you have had a chance to look up the data for accidents resulting from mid-street parking in Downtown. We're trying to include that data for the backup to the parking item going before the commission and the back up is due this week.
